

Technological progress is unstoppable. We neither. And because we are growing fast, we need the best people we can imagine.

We are looking for a

Project Manager

We are searching personalities who already have experience in project management and would like to challenge themselves to independently manage projects in the area of innovative technologies (such as High Performance Computing, Big Data Management) in industrial and scientific environments. You work together with industry partners, universities and research institutes at EU level.

YOUR TASKS...

- ✓ Support and takeover of technical and / or organizational leadership, mainly in a recognized EU project and support in other projects
- ✓ Communication point to customers, sponsors and stakeholders
- ✓ Coordination of development activities
- ✓ Participation in international project meetings and conferences
- ✓ Collaboration with project controlling

YOUR PROFILE...

- ✓ Completed education (University, FH) in the economic or technical field
- ✓ Professional experience in IT project management
- ✓ Ideally experience in handling R&D projects
- ✓ Strong team and communication skills
- ✓ Practical experience with methods of software development
- ✓ High quality awareness and willingness to assume responsibility for results
- ✓ Very good knowledge of English
- ✓ Interest in international networking
- ✓ Willingness to travel (expected 1x / month)

We offer a performance-based salary (not an all-in agreement). The minimum salary ranges according to the collective agreement IT (Kollektivvertrag IT) according to qualification and experience in level ST2. Willingness to overpay depending on your profile.

We look forward to hearing from you:
